PerkinElmer Hosts Nanomaterials Seminar

- What:** Hosted by PerkinElmer, Nanolytica 2012 is a one-day workshop that brings together key speakers recognized in the advancement and analysis of nanoscience. The workshop will cover an array of topics from the impact of nanoparticles on our environment to the latest analytical and application developments. For more information, visit www.perkinelmer.com/nano. Register today for this informative and complimentary event by emailing Anthony.Rhoden@perkinelmer.com.
- Who:** Nanoscience experts will be presenting from a variety of organizations including UC San Diego, U.S. Environmental Protection Agency and PerkinElmer.
- Where:** University of California, San Diego
The Structural and Materials Engineering Building
9500 Gilman Drive, La Jolla, CA
- When:** Friday, October 12, 2012 9:00 am – 3:00 pm PST
- Why:** Nanotechnology is a rapidly evolving field with increased activity and interest from the scientific and engineering communities. This seminar will highlight information about engineered nanomaterials so that participants will be better informed about nanomaterials applications. Additionally, presenters will share information on the wide range and types of measurements needed to characterize nanomaterials as well as the PerkinElmer solutions for this area of focus.
- Media Contact:** If you are a member of the media interested in scheduling a one-on-one conversation with a PerkinElmer nanoscience expert, please contact:
