PerkinElmer to Display Innovative Offerings at Expoquimia 2014 Barcelona

WHAT: [PerkinElmer, Inc.](#), a global leader focused on the health and safety of people and the environment, today announced that it will feature several advanced products and services at Expoquimia (Booth # E238). This international chemistry trade show will be held September 30-October 3 at the Gran Via Exhibition Centre in Barcelona, Spain.

"PerkinElmer provides customers in Spain with a wide range of innovative solutions for environmental monitoring, chemical and petrochemical analysis, food and beverage authenticity, nutritional and safety testing, pharmaceutical applications, therapeutic drug development, and neonatal and newborn screening," said Marco Buonaguidi, Sales Director Environmental Health Italy and Spain, PerkinElmer. "We're excited to participate in Expoquimia to showcase how our offerings effectively address the challenges of the modern laboratory."

PRODUCTS: PerkinElmer will display the following instruments and services designed for laboratory professionals at Expoquimia (Booth # E238):

[NexION® 350 ICP-MS](#): PerkinElmer's newest atomic spectroscopy product designed to empower laboratory professionals with greater efficiency in elemental analyses, specifically delivering the most accurate characterization of nanoparticles in the market. The NexION 350 operates using [Syngistix™ for ICP-MS Software](#), a proprietary workflow-based atomic spectroscopy platform featuring an intuitive interface with easy navigation for each step of an analysis -- from starting the instrument, to optimizing the system, to creating methods and sample lists. Syngistix is also compatible with the [TIBCO® Spotfire®](#) analytics platform for data visualization, insight and time savings.

[DairyGuard™ milk powder analyzer](#): near infrared (NIR) spectrometer specifically developed for food suppliers and manufacturers. The DairyGuard analyzer is the only system available that tests for unknown adulterants as well as known compounds.

[AxION® 2 TOF MS](#): an instrument that includes a broad array of detection capabilities designed to simplify and streamline virtually any analytical workflow that requires full spectrum capability, speed, sensitivity, or dynamic range. It offers exceptional sensitivity, along with PerkinElmer's patented TrapPulse™ capability, for use in environmental, forensic metabolite identification, impurity profiling, food safety, nutraceutical, or product degradation analysis.

[AxION® Direct Sample Analysis™ \(DSA™\)](#): sample introduction technology that brings ease, productivity and enhanced performance to any lab and provides a robust alternative to front-end GC or LC systems. No up-front chromatographic separation, lengthy method development, and minimal sample preparation are needed when using AxION DSA. Analytical labs specializing in food, forensics, environmental, pharmaceutical and industrial research are using the AxION DSA to significantly save analysis time.

[Spectrum Two™ IR Spectrometers](#): a system that helps perform fast, accurate IR analysis and assure the quality of materials across a wide range of industries, including product quality checking in QA/QC and analytical environments, forensics and academic teaching laboratories. Highly transportable with optional wireless connectivity, this IR system delivers lab quality performance both in the field and the lab.

[Titan MPS™ Microwave Sample Preparation System](#): a safe, simple, cost-effective microwave sample preparation system for pressure digestion of a broad range of samples. Its intuitive design offers a color touch-screen controller, top-loading system to access the 8 or 16 reusable vessels, PFA-coated stainless steel body and a wide range of pre-loaded digestion methods for ease of use.

[OneSource® Laboratory Services](#): a single source for laboratory services, with a global team of certified, factory-trained customer support engineers. PerkinElmer's OneSource programs are flexible and scalable, tailored to the specific needs and goals of individual customers. OneSource offerings are the most comprehensive portfolio of professional lab services in the industry, including complete care programs for nearly every technology and manufacturer.

MORE: PerkinElmer, Inc. is a global leader focused on improving the health and safety of people and the environment. The Company reported revenue of approximately \$2.2 billion in 2013, has about 7,600 employees serving customers in more than 150 countries, and is a component of the S&P 500 Index.
